

control room video wall software

Simple, Smart, Functional and Powerful Design
Cross Platform Browser Based Appliance Web Portal

Create Accelerated Video Walls and Spot Monitors using
Powerful 'off the shelf' Professional Graphics

Lower Cost, Higher Performance, Increased Feature Set
for Control Room Application through GPU Technology

Combine Multiple Appliances, User Rights, Privilege
Levels and Login in a Single Browser Session

Integrate Input Source from many existing VMS
Environments

ONVIF, Web Pages, Applications, Capture Cards, Static
Images, and VNC Window Item Remote Control

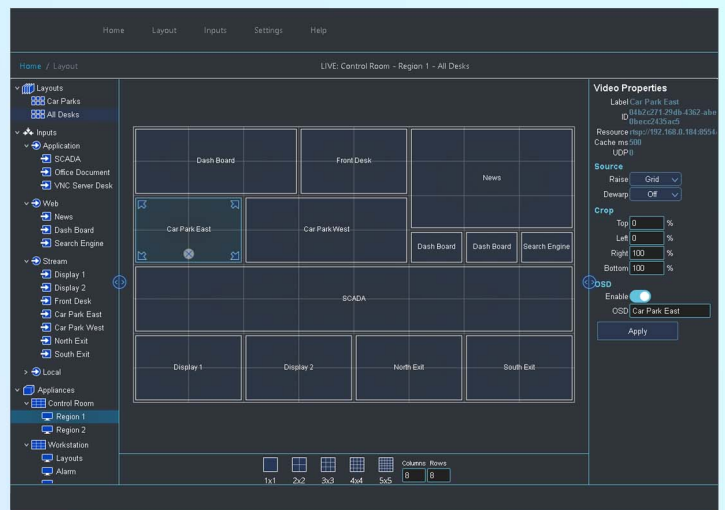

Accelerated Fisheye Lens Correction and Color
Conversion using High Performance Pixel Shaders

Remote Configuration and Setup of Network and
Displays - No Local Appliance Keyboard or Mouse
Required

Control, Position, Crop and Raise Item Windows
Anywhere on the Selected Appliance Desktop

Create, Save, Automate and Recall Layouts onto Display
Appliances

Simple Alarm Cycle Interface for AI Triggered Events,
Configure Regions and Flash Borders

Leveraging Multi GPU Hardware from AMD, Intel and
NVIDIA - NVision exposes integrators and users to
choice of hardware selection at improved performance
and lower cost.

Access NVision via a browser based web portal for
configure and control of all discovered remote display
appliances in a single session.

PC, Tablet or Mobile device, NVision provides all
professional functionality in a single cross platform
interface.
